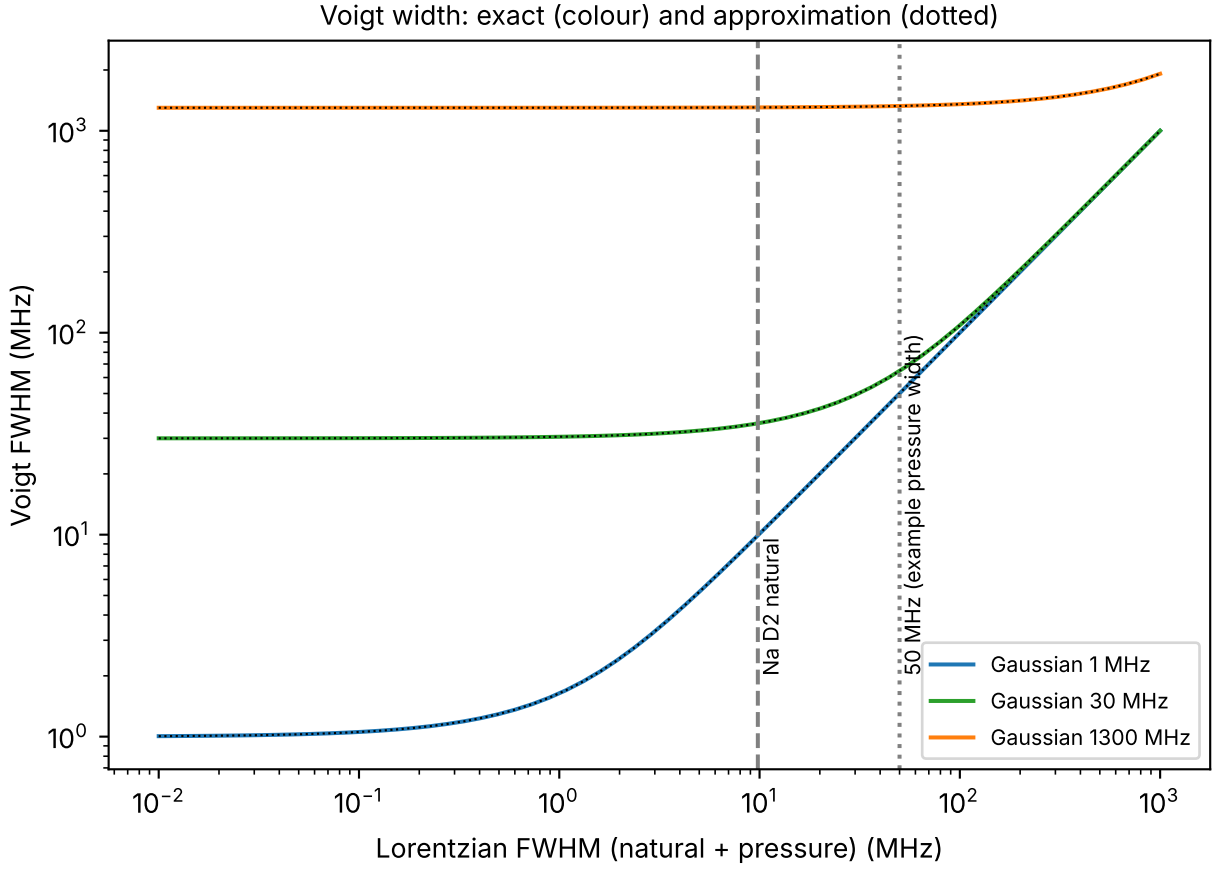
Na D2 hyperfine lines; natural width 9.8 MHz
T = 300 K: Doppler 1.32e+03 MHz
T = 1 K: Doppler 76 MHz
T = 0.001 K: Doppler 2.4 MHz
normalised intensity
frequency from D2 centre of gravity (MHz)



Voigt width: exact (colour) and approximation (dotted)
Voigt FWHM (MHz)
Lorentzian FWHM (natural + pressure) (MHz)
Na D2 natural
50 MHz (example pressure width)
Gaussian 1 MHz
Gaussian 30 MHz
Gaussian 1300 MHz
